## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 2, 5 – 6, 8 - 9, 12 – 16 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application No. 20010046304 (Rast).

With respect to claims 1 - 2, 8 – 9, 12 – 16 and 18, note Paragraphs 0007, 0009, 0010, 0013, 0015, 0017, 0022, 0025, 0049, 0052, 0056 – 0057, 0059 and 0061.

With respect to claim 5, note element 24.

With respect to claim 6, note Fig. 1.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19 – 27 and 30 - 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over f U.S. Patent Application No 2002/0013784 (Swanson) in view of Rast.

Art Unit: 2642

With respect to claims 19 – 20, 23, 26 and 37, note that Rast can connect to a phone (see paragraph 0019). However, it is unclear as to whether one can actually communicate (talk to a caller) or one can just hear the ringing and then must take off the headset and then to proceed to use the phone.

Note that Swanson teaches a portable device comprising a sensor to sense an audio signal and a control unit; such are inherent in 3G phone 64. The storage unit could be the user's PC or at the service provider (Paragraphs 0024 and 0028). Also note storage units in Rast. It would have been obvious to incorporate the noise reduction elements of the headset as taught by Rast into the telephone of Swanson in order to have better communication quality.

With respect to claim 21, note Paragraphs 0004, 0006 and 0042 of Swanson.

With respect to claim 22, note Paragraph 0007 of Rast.

With respect claim 24, anything is removable.

With respect to claim 25, it would have been obvious to one of ordinary skill in the art to use multiple sensors as such would only be duplicative of what is known in the art.

With respect to claim 27, note Paragraph 0053 of Rast.

With respect to claim 30, note the phone of Swanson.

With respect to claims 31 and 34, note Paragraph 0053 of Rast.

With respect to claim 32, note the paragraphs recite with respect to Rast above.

With respect to claim 36, note Rast and the Abstract of Swanson.

With respect to claims 35 and 38, note Paragraph 0018 of Rast.

Art Unit: 2642

With respect to claim 33, cell phones have displays to view video from the Internet (note use of Internet in Rast and Swanson and their respective displays). Though neither expressly discloses "video", it appears that both can obtain video and if the video has sound that would be the second signal. Even if this was argued, music videos are old in the art and it would have been obvious to one of ordinary skill to incorporate such ability (if not already inherent in both) into either the Rast or Swanson devices.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
